WHY IS TECH IMPORTANT FOR ENTREPRENEURS?

Take a look around you...technology is in almost every part of our lives. Even if you are resistant to technology in your personal life, you cannot afford to be resistant in your professional life. Why? Because you'll lose business...plain and simple. Your customers use technology. They are dependent upon it, and quite frankly, they love it. You will be left behind in the business world if you don't do everything you can to make your customer's experience easy and efficient through the use of technology.

The key to streamlining your business, and incorporating technology into your processes, is to start small. Start with a business email service and an email marketing service. Grow from there. Use the list attached as a jumping-off point. The list is not comprehensive and will continue to change, as we find new products and systems we like.

Enjoy and let us know if you have other great tech tools we should add to our list!
